

## **DEVOPS INTERN JOB AD**

### **About TCS IT unit:**

TCS Hungary, in its IT services area, implements best-in-class solutions for the Business 4.0 era, enabling strong digital foundations for our customers worldwide. Our work includes hybrid cloud solutions, hand-in-hand with Google Cloud or Amazon Web Services native architectures, building scalable and efficient solutions. Our scope of work covers agile, cloud-based and fullstack application development, DevOps automation and many more.

### **The key requirements for the role are:**

- being a full-time BSc/MSc student enrolled at a Hungarian university studying Computer Science or related studies
- if you are required to complete a mandatory internship during your studies which is no more than 320 hours
- if you speak fluent English and looking for international experience
- if you have good experience with Linux, shell scripting, Git or Virtualization or Jenkins and would like to extend your skills as a devops engineer
- if you are interested in modern devops practices
- if you can imagine yourself in large scale, international development projects

### **and advantages would be the knowledge of:**

- if you are familiar with Git or similar for Continuous Integration and Jenkins or similar for Continuous Delivery
- if you are familiar with deployment of RESTful APIs and related concepts (API management, security, etc.)
- if you are familiar with Microsoft Azure, Amazon Web Services or Google Cloud Platform in any nature

### **your responsibilities will be:**

- You will be learning devops principles
- You will be designing and implementing CI/CD pipelines

- You will be working with Ansible, Docker and Kubernetes and various PaaS solutions
- You will be studying large scale, cloud native software architectures
- You will experience working in agile DevOps methodology
- You will experience working at a fast-growing, truly colorful company
- You will be mentored by senior engineer colleagues regularly

**What we are offering:**

- Possibility to start a global career in IT in a global and multicultural environment
- Digital internship program focused on constant innovation and application of emerging technology
- Possibility to work with clients leading in their industries
- Internship induction & mentoring programme
- Comprehensive opportunities for additional training and development through our Talent Development programme and online learning platforms
- A successful employee engagement & community volunteering platform
