QUALITY ASSURANCE INTERN JOB AD

About TCS IT unit:

TCS Hungary, in its IT services area, implements best-in-class solutions for the Business 4.0 era, enabling strong digital foundations for our customers worldwide. Our work includes quality assurance, hand-in-hand with Google Cloud or Amazon Web Services native architectures,building scalable and efficient solutions. Our scope of work covers agile, cloud-based and fullstack application development, DevOps automation and many more.

The key requirements for the role are:

- being a full-time BSc/MSc student enrolled at a Hungarian university studying Computer Science or related studies

- if you are required to complete a mandatory internship during your studies which is no more than 320 hours

- if you speak fluent English and looking for international experience

- if you have good experience with Javascript, Typescript or Cypress, Playwright and would like to extend your skills as a QA engineer

- if you are interested in modern testing practices

- if you can imagine yourself in large scale, international development projects

and advantages would be the knowledge of:

- if you are familiar with Playwright or similar for Automated testing or has understanding of ISTQB principles

- if you are familiar with developing automated tests with JavaScript or TypeScript and related testing concepts (unit testing, modul testing, integration testing, smoke testing, etc.)

- if you are familiar with manual testing concepts

your responsibilites will be:

- You will be learning QA/testing principles

- You will be designing and implementing automation end to end tests

- You will be working with Playwright or similar testing frameworks

- You will be studying large scale, cloud native software architectures

- You will experience working in agile development methodology

- You will experience working at a fast-growing, truly colorful company

- You will be mentored by senior engineer collegaues regularly

What we are offering:

- Possibility to start a global career in IT in a global and multicultural environment
- Digital internship program focused on constant innovation and application of emerging technology
- Possibility to work with clients leading in their industries
- Internship induction & mentoring programme
- Comprehensive opportunities for additional training and development through our Talent Development programme and online learning platforms
- A successful employee engagement & community volunteering platform
